## **SKILLS**

Languages: Java, C++, C, python, x86 Assembly, MIPS Assembly, SQL

Technologies: Zookeeper, Android Studio, Git Version Control, Oracle Database 10g, OpenSSL, JUnit

## **EXPERIENCE**

AUGUST 2018 – MAY 2019

### **Correlating Android App Behavior with Network Traffic – Kryptowire, LLC.**

This senior design project focused finding a correlation with Android API method calls that obtain personally-identifiable information with the data that the device sends over the network.

Our solution consisted of two modules: a module that hooks and logs system calls on a target Android device, using the Xposed Framework, and a module that parses and correlates the data from the previous Android module with the data from a Man-in-the-middle attack tool, Mitmproxy, which captures the network traffic.

- Designed and submitted a project proposal based on client's RFP
- Managed project logistics as team leader
- Interfaced with client through weekly/monthly reports, bi-weekly meetings, and e-mail.

Tools: Android Studio, Java, python

## **EDUCATION**

AUGUST 2016 – MAY 2019

### **BACHELOR OF SCIENCE IN COMPUTER SCIENCE, GEORGE MASON UNIVERSITY**

Cumulative GPA: 3.12

AUGUST 2013 – MAY 2015

### **ASSOCIATE OF SCIENCE IN COMPUTER SCIENCE, THOMAS NELSON COMMUNITY COLLEGE**

Cumulative GPA: 3.5
